

Maximum Output

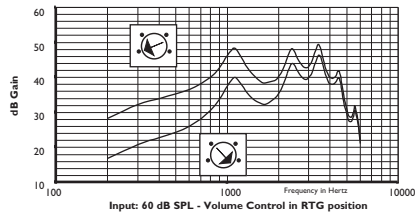

Maximum Gain

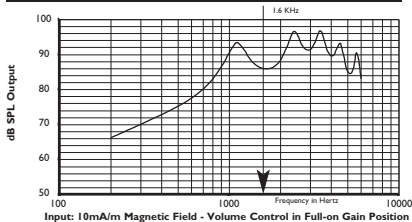

Effect of 'AGC-o' on Maximum Output

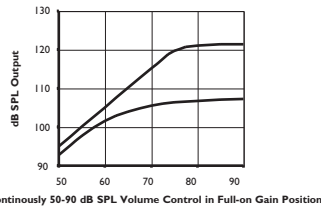

Basic Frequency Response & Effect of 'H' Control

Telecoil Response

Characteristics of 'AO' at 1600Hz

Dimensions: Height: 30mm **Width:** 12mm **Thickness:** 8.7mm **Net weight:** 3.2g

Colours: Beige, Brown, Grey and Caramel

AGC-o Output Limiting Control (AO). Red Trimmer. Pre-set output limiting automatic gain control. Rotation of the 'AO' control in a clockwise direction will introduce output limiting upto nominal 14dB at 1600Hz.

Low Frequency Tone Control (H). White Trimmer. Pre-set low frequency suppression control. Rotation of the 'H' control in a clockwise direction will introduce low frequency suppression upto a nominal 17dB at 300Hz
